

Photo-Lighting Workshop with Dave Montizambert

One Light Madness!!!

—Photography Lighting On A Budget

Learn how to create incredible portrait & fashion/glamour lighting using only one light in this in-depth session by international lighting wizard Dave Montizambert. Dave shows how he forces one light (off-camera flash or studio strobe) to do the work of three to five lights. He also simplifies & makes easy—for even the most non-technical mind—the necessary lighting theory & concepts that are required knowledge for any lighting job. No fluff here, just solid nuts & bolts lighting information that every photographer should know!

From this program participants will learn:

- ★ Create multi-light-source setups using only one light.

- ★ Lighting basics—light placement, angling, feathering.
- ★ How to use light to convey mood.
- ★ Create low-key and high-key dramatic lighting.
- ★ Simulate sunlight on cloudy days using only one light.
- ★ How to master metering & lighting ratios.
